Training Materials

These supporting training materials give you the detail about your zone plans and where the system components are located.

You have been given access to the zone plans relevant to your work area or floor. If you have any queries please contact your workplace course administrator.

Your EMiP System

These are the components for your system.

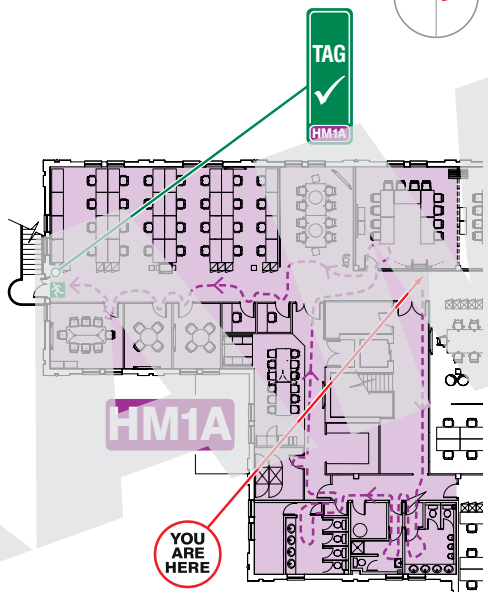
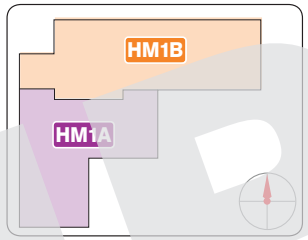
PLAN ORIENTATION





SWEEP EVACUATION INSTRUCTIONS

ON HEARING THE FIRE ALARM

1 Check all people have vacated your search area

2 If applicable, check Refuge Area is clear

3 On confirming your zone is checked and clear, proceed to the Evacuation Control Point and report.

On confirming zone is checked and clear, take TAG to the TAG Control Point located:

Outside Hembury Reception

PLAN ORIENTATION

The direction of the sweep is shown as a suggested route for indicative purposes. The Evacuation Marshal should use their own judgment to take the route suitable at the time of the Evacuation and in the circumstances.
